

The lectures plan:

1. Isomerism
2. Tautomerism
3. Benenoid Hydrocarbons
4. Fullerenes
5. Conformational isomerism
6. Chirality
7. Topological structures
8. Substituent effect
9. Aromaticity: geometrical description
10. Aromaticity: magnetic description

The lectures will be on-line on Fridays at 10.00.

The first lecture will be on Nov. 4 and the last on Feb. 3.
